

# Your Natural Choice for Interventional Radiology

Enhance your ability to provide angiographic care with an injector that delivers versatility, control, interoperability[1] – and the trusted support of a pioneering leader in the field of angiography.

The Bayer MEDRAD® Mark 7 Arterion Injector is an established contrast injection system to support your clinical success in angiographic diagnostic and interventional procedures.

## Your Versatile Injector

The Arterion is used in multiple interventional and diagnostic procedures, including endovascular aortic repair (EVAR),[2,3] transarterial embolization (TAE),[1] and cerebral angiography.[4]

- Versatile disposables, flexible configurations, and connectivity with imaging equipment help enhance workflow efficiency.

### Mounting configurations

**Freestanding Pedestal on Wheels or Adjustable Height Pedestal on Wheels.**
Additional accessory option to relocate the injector head from the table.

**MEDRAD® Arterion Table Mount***

**MEDRAD® Arterion Overhead Counterpoise***

**Dual Monitor Option, with any mounting option****

*Display control unit can be mounted on a desk, table, or wall.
**Multiple mounting options are available for dual display.

## Gain Control and Confidence

Surveyed interventional cardiologists and interventional radiologists agree that the Bayer MEDRAD® Arterion injector has reliable performance, is suitable for a broad range of interventions, and is efficient to use.[5]

### Automated and manual control of your injection

- Automated delivery of injection with parameters you set.
- Consistent and precise contrast delivery at fixed (automated) and variable (manually controlled) flow rates.
- ISI connectivity to enable injection control from imaging equipment.

## Well-Connected, Efficient Workflows

Versatile disposables, flexible configurations and connectivity with imaging equipment help to enhance workflow efficiencies.

### Automated and manual control of your injection

- Automated delivery of injection with parameters you set.
- Consistent and precise contrast delivery at fixed (automated) and variable (manually controlled) flow rates.
- ISI connectivity to enable injection control from imaging equipment.

## A Complete Solution – With Ultravist®

Together with our contrast media, we provide you our imaging solution. Ultravist® (iopromide) has an extensive history of use, and a well-proven renal and general benefit-risk profile.[6-13]

## From a Trusted Pioneering Leader in The Field of Angiography

Bayer has over 50 years of experience in the field of power injection and contrast media.

- On-site clinical training to help you perform procedures with confidence from day one.
- High quality on-site device service and emergency technical support – around the clock.
- Our quality care comes in customized solutions.
